As there were only 5 entries AND the entered averages were so diverse in comparison with each other, in the interests of 'fairness' I gave each shooter an 'Own Start' based very simply on the average of their best three rounds completed out of the first five rounds submitted. The 'start' was then added to their gun score to reach the total score shown. where a shooter exceeded their calculated average the score for the round has exceeded the MPS for the round!

Angi was deployed to Afghanistan and had hoped to shoot during some 'down time' but was unable to do so.
